1900.

[Cd. 66.] Price 1½d.

1900

No. 1,793

DUBLIN CASTLE,

29th January, 1900.

GENTLEMEN,

I have to acknowledge the receipt of your letter of the 27th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Eighteenth Annual Report on the condition and progress of the Royal University of Ireland.

I am, Gentlemen,

Your obedient Servant,

D. HARREL

The Secretaries,

Royal University,

Earlsfort Terrace.

EIGHTEENTH REPORT

OF

THE ROYAL UNIVERSITY OF IRELAND.

TO HIS EXCELLENCY GEORGE HENRY, EARL CADOGAN, K.G.,
&c., &c.,
LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

THE ROYAL UNIVERSITY OF IRELAND,
January, 1900.

MAY IT PLEASE YOUR EXCELLENCY,

I have the honour to submit the Annual Report on the condition and progress of the University.

The total number of persons who entered for the various Academical Examinations of the University during the year 1899, was 2,855 ; while in the previous year it was 2,808.

The Appendixes to this Report contain Tables giving all important details connected with the Examinations held in 1899, for both male and female candidates. A Table is also given showing the Academic progress, in the various Faculties, made by Students matriculated in 1881 to 1898, inclusive.

I regret to have to report that two vacancies on the Senate occurred during the year by the deaths of The Right Hon. C. T. Redington and The Right Hon. William O'Brien. The former vacancy has been filled up by the appointment of Colonel Ross of Bladensburg, C.B., and the latter by the appointment of Sir Henry Bellingham, Bart.

The period for which Professor Stephen O'Sullivan, M.D., had been elected by Convocation as a member of the Senate expired on May 5, 1899, and Convocation elected in his room J. Walton Browne, M.D.

There were two public meetings of the University in 1899. The first was of a formal character, and was held on the 11th day of May, for the purpose mainly of admitting to their degrees the candidates who had passed at the Medical Examinations held a short time previously.

The usual annual meeting of the University to confer degrees in the several Faculties, and to declare the distinctions obtained by candidates at the Honour Examinations, was held on the 27th day of October. Details of proceedings at this meeting are given in Appendix II.

In conformity with the provisions of the Act of Parliament, 44 and 45 Vic., chap. 52, the accounts of the receipts and expenditure of the University, with the corresponding vouchers and other documents, are rendered quarterly to the Comptroller and Auditor-General, who submits an annual report and abstract to Parliament.

I have the honour to be

Your Excellency's faithful and obedient servant,

DUFFERIN AND AVA.

APPENDICES.

APPENDIX I.

DEGREES CONFERRED.

February 2, 1888.

FACULTY OF MEDICINE.

Master of Obstetrics.

Tushey, John Francis.

APPENDIX II.

EIGHTEENTH ANNUAL MEETING OF THE ROYAL UNIVERSITY OF
IRELAND.

OCTOBER 27, 1899.

The Eighteenth Annual Meeting of the University was held on October 27, 1899.

The Chancellor, The Most Hon. THE MARQUIS OF DUFFERIN AND AVA, opened the proceedings with the following address:—

LADIES AND GENTLEMEN,—Although there can be no more auspicious occasion in the annual routine of a University than the day on which the authorities and the students meet together in common accord, the one to confer and the other to receive the well-merited honours that have been gained by the successful candidates during the course of the current year, there almost invariably mingles with our rejoicings a note of sorrow and regret for those members of our body whom death has suddenly snatched from amongst us. Last year I had to express on behalf of those assembled within these walls, and especially on behalf of his brother Senators, our sense of hereavement at the disappearance from our ranks of the late Archbishop of Dublin. To-day we have to mourn the absence from his accustomed post of our late beloved Vice-Chancellor; and on looking at the spot from which he so often addressed us, I seem still to see his familiar form and to hear the music of his sympathetic eloquence. Gentlemen, there are few persons who have deserved better of their country; there are few persons who have deserved better of this University than the late Right Honourable Christopher Redington. He was a patriot in the truest sense of the word, for during the course of his useful life, during the discharge of his official duties, and in the advocacy of his political opinions, self, self-interest, and the consideration of personal advantage were absolutely absent from his mind. Duty, Industry, Truth, Integrity, Benevolence, Justice, and sound Commonsense were the elements of his character, and their golden threads were inextricably interwoven into the very texture and tissues of his blameless life. In his own home beloved by his neighbours, tenants, and dependants, in his public life honoured and trusted by his Sovereign and Her Ministers, and, as a dignitary of this University, respected and deferred to by his colleagues of the Senate, he has left behind him for your imitation a standard of excellence in every relation of life, whether public or private, which none of you will ever better, and which all of you would do well to strive to attain. But, though regret for his loss and admiration for his memory will ever remain amongst us, we at all events have the consolation of knowing that the duties of his great office will be continued by one whose talents and whose character have already raised him to an eminence which even the great honour thus recently conferred upon him may, indeed, still further adorn, but cannot enhance. With feelings of the greatest personal gratification I now beg to congratulate the Senate, the authorities of the University, and the students, on the appointment of Lord Morris to the Vice-Chancellorship of the Royal University of Ireland. His accession to this position will add lustre to

our whole body, and the intimate acquaintance which his long professional experience, reinforced as it has been by his genial temperament, has enabled him to acquire with the needs, aspirations, and idiosyncracies of all classes of our fellow-countrymen, will render his assistance of exceptional use to us. Of the pleasure which you will derive from his Addresses I need not speak. Indeed I was most anxious that upon this very occasion you should have had an opportunity of listening to his genuine and spontaneous eloquence, in lieu of the dull and formal sentences with which, I am afraid, I am in the habit of wearying your patience. But though circumstances have prevented the momentary realisation of this intention, I trust that another year Lord Morris may be kindly induced to occupy this chair.

The vacancy created in the Senate by Lord Morris's promotion has been filled by the appointment of Ross of Bladensburg, a name which recalls to our recollection one of those many historical feats of arms in which our countrymen are generally found to have enacted the leading part, and which for all time will be noted in our annals as illustrating not only the gallantry, but also the proud modesty of our new colleague's distinguished ancestor, who preferred retaining his forefather's simple name, coupled with that of the scene of his victory, to a peerage and the high-sounding title his Sovereign was anxious to bestow upon him. Those who have the advantage, as I have, of being personally acquainted with the present representative of the family, are well aware that the traditional talents and virtues of the great grandfather still shine with unabated lustre in his descendant.

Nor in recounting these accessions to the prestige of the University can I pass over in silence the well-merited honours recently conferred by the Crown on our talented and devoted Senior Secretary. Almost twenty years have passed since Sir James Creed Meredith entered upon the discharge of his important and laborious duties, at the invitation of His Grace the Duke of Marlborough. The University was then a new-born institution, and only those intimately acquainted with its history can form an adequate idea of the debt of gratitude we owe Sir James. His sound judgment, his tact, his geniality, and his large conception of the possibilities of extended usefulness which wise management might place within our reach, have contributed as much as any other influence which can be mentioned to the creation of that confidence which is reposed in us by the community at large, as evidenced to-day not only by the number of our students, but also by the value universally accorded to our degrees; and I can assure you, Sir James, that the Senate and all the members of our body corporate join with me most heartily in congratulating you on the great distinction conferred upon you by Her Majesty, which in some sort they are proud to regard as a tribute to the merits of the great institution over which they preside.

Turning now to the immediate business of the meeting, there are only one or two points to which I need call your attention. When we were last met together, I had the pleasure of announcing that we intended to issue Diplomas for excellence in the art of teaching. Now, teaching is not only one of the most useful and honourable duties in which anyone can engage, but I am sorry to be obliged to add it is also one of the most difficult. A good teacher is as much born as a good poet. His task requires many rare and various excellencies, all of which are of no less importance than acquaintance with the subjects he undertakes to handle—supreme patience, acute discernment of character, intense sympathy, a presence and countenance inspiring respect and attracting confidence

and affection, a lively energetic manner, and, above all, the magical gift of disseminating an exuberant vitality through the minds and nervous systems of his pupils. What he has to do is to infuse into the usually heavy atmosphere of a school-room the ozone and oxygen of his own temperament. Now, the determination we have arrived at in connection with this matter is to allow only those candidates for teaching honours to pass through our sieve who are the happy possessors of at least a preponderance of these wonder-working qualities, for the ferula of a discerning dominie is, indeed, the wand of an enchanter. Its electric energy can evoke and stimulate into fruitful activity the highest powers of the intelligent pupil, while, if applied to what we will call the negative pole of the subject under treatment, it is capable in the hands of a skilful operator of producing considerable results even in the case of the dullard. The examination to which I am referring was held for the first time this autumn. Two candidates presented themselves, but neither of them satisfied the examiners. Now, this must not be regarded as at all a discouraging fact, for it clearly indicates the high standard of excellence which it is proposed to maintain in this examination. The authorities of the University regard the examination as a purely professional one, and they have determined that the general pass standard shall be, as in the other professional examinations, 50 per cent. in each subject prescribed. When these regulations become generally known, there can be little doubt that many candidates will contend for these Diplomas which mean so much. On the other hand, as a bad, dull, spiritless, unsatisfactory teacher is almost worse than none at all, his incompetence and the disadvantages which spring from it, exercising, as they cannot fail to do, in many cases a permanent influence on the lives of his scholars, the general public, whether as parents of children in *status pupillari* or as Managers or Patrons of Schools, will eventually come to insist that every candidate for a vacant Mastership shall be furnished with our *Exequatur*.

You will also remember that last year I announced to you that we had instituted a Diploma for a knowledge of Agriculture founded on a scientific basis. The arrangements for the Examinations for this Diploma are now complete, and it is to be hoped that many candidates will present themselves during the coming year.

Before proceeding to refer to the list of successful students I desire to express my personal satisfaction at being privileged to confer on one of our most eminent countrymen the honorary degree of LL.D., which it has been the pleasure of the Senate to award to the Right Honourable William J. Pirrie. A more deserving recipient of this great honour has seldom appeared before us, for what greater merit can be attributed to an Irish citizen than that by his talents and indefatigable exertions he should have so stimulated the industrial activity of his native town as to have had a principal share in raising it in the course of a few years from its former comparatively inferior position to that of being the third greatest commercial city in the whole British Empire. London, Liverpool, Belfast, Glasgow is the order of precedence now prevailing amongst these rival commercial centres, and only those who have been acquainted with the locality, as I have for more than fifty years, can appreciate the change which has been effected by the men of Mr. Pirrie's stamp. The supreme honour has been his of superintending and promoting Belfast's unexampled achievements in shipbuilding, which have recently fitly culminated in the launch and prosperous voyage of the *Oceanic*. What Ireland needs is accumulated capital,

and manufacturing and commercial expansion to supplement her agricultural industries; and rightly do we honour those who, like Mr. Pirrie, have contributed so largely to these desirable results.

It is now my pleasant duty to refer to some of the principal awards, and in doing so I desire most heartily to congratulate not only those whose pre-eminent honours I am about to recite, but all the other students of every class who have earned distinction by their industry and talents, no matter of what degree.

In the Examinations of 1899 the following distinctions have been gained amongst others:—

1. Junior Fellowship in English and History (£200 a year for four years), Joseph J. Nunan, LL.B. Mr. Nunan, I am pleased to say, has recently been appointed Vice-Consul and Chief Judicial Officer at Blantyre, in the Central Africa Protectorate.

2. Junior Fellowship in Natural Philosophy (also £200 a year for four years), John Henry, M.A., B.E., Queen's College, Galway.

3. Studentship in Ancient Classics (£100 a year for three years), Dominic Kelly, B.A., University College, St. Stephen's-green, Dublin.

4. Studentship in Mental Science (£100 a year for three years), James Creed Meredith, M.A., University College, St. Stephen's-green, Dublin.

5. Studentship in Mathematics (£100 a year for three years), Michael F. Egan, B.A., University College, St. Stephen's-green, Dublin.

6. Gold Medal for highly distinguished answering at the M.D. Degree Examination, Thomas Houston, B.A., M.B., B.Ch., B.A.O., Queen's College, Belfast.

7. Gold Medal for English Verse Composition, William Byrne.

8. Five female candidates entered for M.B., B.Ch., B.A.O. Degrees Examination in October, and all passed the examination.

And now, gentlemen, it only remains for me to express my gratification at having been again permitted to preside at one of these important celebrations. Nobody can discharge the duties upon which I am about to enter without feeling the deepest sympathy for the young men and young women who are thus upon the eve of entering on their various professional careers under such gratifying auspices. As I grasp each successful student's hand, my heart leaps forth with the sincerest aspirations for his future success in life. Up till now they have been sheltered, the most of them I trust, within the secure fold of their several happy homes. From thence they have flocked into our tranquil and spacious courts, selecting, as their instincts may have directed, this or that shrine of learning wherein to fit themselves for whatever fortune may await them; and now upon this solemn occasion we throw open the golden gates of Enterprise, and we see them stream forth into that outer world where the battle of life awaits them, with its labours and temptations, its strife, its trials and its disappointments, and all the various vicissitudes that are the lot of human beings. But, at all events, we have the satisfaction of knowing that not one has passed out from amongst us, the edge and temper of whose sword our officers have not proved, and the joints of whose harness have not been tested to the utmost. As they disappear in the distance along their several paths, I hope they will remember that they carry with them the warmest benedictions of their whilom examiners and advisers, accompanied by the hope that, for the honour of the University, their future life will not only bear testimony to their intellectual superiority, but that they will carry high above their heads the standard of a pure, blameless, patriotic, and God-fearing life.

Sir James Creed Meredith, one of the Secretaries of the University, then read the list of successful candidates for Degrees, and the persons named were presented by Dr. Joseph McGrath, the other Secretary, to the Vice-Chancellor, who admitted them to their respective Degrees.

Modern Literature Scholarship, .	2	—	—	—	
Classical Studentship,	4	—	—	—	Studentship obtained.
Mathematical	2	—	—	—	Studentship obtained.
Mental Science,	5	—	—	—	Studentship obtained.
Biological Science Studentship, .	1	—	—	—	
History, &c., Studentship, . . .	1	—	—	—	
Natural Philosophy Junior Fellowship,	2	—	—	—	Fellowship obtained.
English and History,	1	—	—	—	Fellowship obtained.

APPENDIX VI.

WOMEN STUDENTS, 1899.

Name of Examination.	Examined.	Rejected.	Passed.	Number who obtained Honours.	Distribution of the Honours among the different Subjects of the Examination.
Matriculation (Summer),	226	79	156	27	Latin, French, English, Mathematics, 1 Natural Philosophy, 1 Latin, French, Mathematics, Natural Philosophy, 1 Latin, German, English, Mathematics, 1 Latin, French, Natural Philosophy, 1 Latin, French, English, 2 Latin, German, Mathematics, 1 German, English, Natural Philosophy, 1 Latin, Greek, 2 Latin, French, 4 Latin, English, 1 Latin, German, 1 French, English, 1 German, 2 French, 12 English, 4 Natural Philosophy, 1 Latin, French, English, 3 Latin, German, English, 1 Latin, Greek, 2 Latin, French, 1 French, English, 2 English, Mathematics, 1 Latin, 1 French, 8 German, 1 Latin, English, French, German, 2 Latin, Greek, English, 3 English, French, Italian, 1 English, French, German, 1 English, German, Logic, 1 Greek, English, 1 English, French, 1 English, German, 1 English, Logic, 1 French, German, 2 French, Logic, 1 English, 3 French, 1 German, 1
First University Examination (Summer),	124	24	100	26	French, English, 2 English, Mathematics, 1 Latin, 1 French, 8 German, 1 Latin, English, French, German, 2 Latin, Greek, English, 3 English, French, Italian, 1 English, French, German, 1 English, German, Logic, 1 Greek, English, 1 English, French, 1 English, German, 1 English, Logic, 1 French, German, 2 French, Logic, 1 English, 3 French, 1 German, 1
Second University Examination,	97	33	62	15	English, French, 1 English, German, 1 English, Logic, 1 French, German, 2 French, Logic, 1 English, 3 French, 1 German, 1
B.A. Examination (Summer),	49	28	17	—	Honours are not awarded at this Examination.
L.L.B. Degree,	1	—	1	1	Classics, 1 Modern Literature, 5 History, &c., 2 Mental Science, 1 Chemistry and Biology, 1
B.A. Examination (Autumn),	49	23	26	10	
M.A. Examination,	2	1	1	—	
First Medical (Summer),	6	3	3	—	
Second Medical (Spring),	4	0	4	—	
M.B., B.Ch., B.A.O. (Spring),	1	0	1	—	
M.D. Examination,	2	1	1	—	
Matriculation (Autumn),	40	12	28	—	
First University (Autumn),	32	18	14	—	
First Medical (Autumn),	3	0	3	1	
Second Medical (Autumn),	3	2	1	—	
Third Medical (Autumn),	2	1	1	0	
M.B., B.Ch., B.A.O.,	6	0	5	—	
First Examination in Music,	2	—	2	0	
B. Mus. Examination,	6	8	2	0	
Classical Scholarship,	2	—	—	—	
Modern Literature Scholarship,	4	—	—	—	
Mathematical Scholarship,	2	—	—	—	
					2 Scholarships awarded.
